

Hyperion Financial Data Quality Management

Oracle Hyperion Financial Data Quality Management (FDM) is a packaged solution for finance users that helps develop standardized financial data management processes with its Web-based guided workflow user interface and powerful integration engine. It enables organizations to eliminate the data integrity risks associated with collecting, mapping, verifying and moving critical financial data across the entire organization.

Financial Data Quality Management's data preparation server can ease integrating and validating financial data from any source system. And to further reduce data integration costs and data mapping complexities, Hyperion Financial Data Quality Management includes prepackaged Enterprise Performance Management (EPM) adapters for Hyperion Financial Management, Hyperion Planning, Hyperion Enterprise, Hyperion Strategic Finance and Oracle Essbase.
